**01 | WELCOME TO YOUR GUIDE**

Welcome to Your Guide

♎ **Libra** | **Air** | **Cardinal**

As a Libra, your path often begins with balance and relationship. This chapter invites you to notice how that theme appears in the ordinary choices in front of you. Your Air element and Cardinal mode do not dictate your future; they give you a symbolic language for recognizing what feels energizing, meaningful, and true.

Your nature can be described as gracious, social, and fairness-minded. At its best, that becomes diplomatic vision. Under pressure, it may ask you to practice decisive self-trust. Instead of treating this as a flaw to repair, consider it a balancing skill that makes your gifts more sustainable and your relationships more honest.

Welcome to Your Guide is a chance to translate insight into a small action. Let your ruling planet, Venus, remind you that the most useful guidance is practical: choose one conversation, habit, boundary, or creative experiment that brings you closer to the person you want to be.

Reflection prompt: Where is balance and relationship already asking for your attention, and what is one gentle next step you can take today?

**02 | YOUR SIGN AT A GLANCE**
